# Setting up Guide

Lamp model: Golden Hour
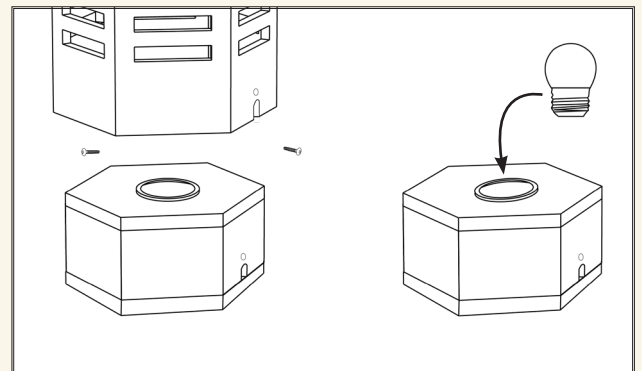

How to set up Golden Hour :

1- With your choice of the lightbulb, you can easily take off the PLA cap and screw in the lightbulb in the socket.

2- Plug the plug-in in a 120V outlet.

3- Switch it on and welcome Golden hour to its new home!

If you wish to slide the base out first:

1- With a number 0, square socket screwdriver, unscrew the (4 x 3/4) screws on both sides of the wooden body.

2- After unscrewing the screws, the base is now disconnected from the body. Slide it out downwards.

3- Screw the light bulb in the socket, screw back the screws, and put the PLA cap on.

4- You are ready to switch Golden Hour on!

If you wish to disassemble the base to get to the socket itself, unscrew the (4 x3/4) screws at the bottom of the base that connects the bottom wooden base to the walls of the base.

All screws used are number 0 square head screws, to unscrew them you need to have a number 0 square socket screwdriver.
